

MF 4

MANUAL ROUTER UNIT

Portable Dovetail Routing unit for the production of dovetail slots in the size W-4. E.g. post and beam construction cross joints or similar applications. Quickly produced in the work-shop or for on-site measured pieces.

Function

The routing position is marked on the work-piece. The MF-4 unit is positioned on the work-piece and secured with screws or G-clamps. The unit then routers manually to the router depth stop. For high precision routing also in the horizontal position.

Technical data

Power supply	1ph/N/PE 230 V, 50/60Hz 1.0 kW
Motor	1 x 1000 W
Rotation speed without load	34.000 1/min.
Control	manual
Work-piece clamping	manual, Screw or G-Clamp
Routing depth	0-220 mm
Hoffmann Key sizes	W 4
Dimensions B/T/H	200 / 300 / 460 mm
Weight	5 kg
Order No.	W101 2000
