

MU 3 H

HORIZONTAL, MANUAL DOVETAIL ROUTING MACHINE

Portable and flexible bench-top machine to router a single horizontal dovetail slot per machine cycle. Dovetail key sizes W-1/2/3/4.

Function

The work-piece is positioned against the centre-fence and the routing length (left & right) is set. By pressing the pneumatic footpedal the work-piece is clamped. The motor is switched on manually and the motor unit is drawn to the set router length. When the part is routed the unit is brought to the middle position, motor switched off and the workpiece is removed after releasing the footpedal.
