

MX-3

COMBINED DOUBLE MITRE SAW AND DOWEL DRILLING MACHINE

Precise miter cuts, to final size at each end of the work-piece plus double-sided drilling for dowels in the faces of one or both sides in a common set-up. For work-piece widths to 140 mm, saw unit can be moved up to 3000 mm cutting length. Dimensional control by visual scale tape or optionally by digital measurement system. Pneumatic saw feed and pneumatic work-piece clamping. Saw and router units on adjustable carriage between $+67^{\circ}/-0^{\circ}/-45^{\circ}$.

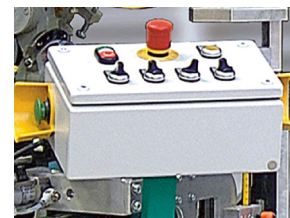

For 6/8/10 mm dowel. Application on doors, cladding, frames and moldings in interior design and furniture.

Variation VARIO 3:

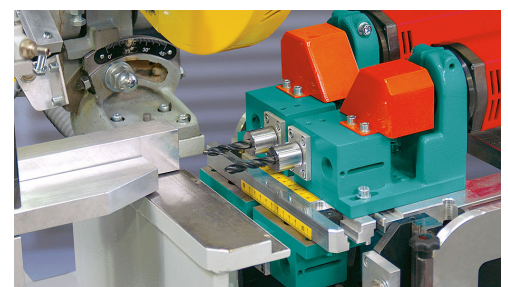

1. For precut work-pieces
2. For bar length material

Technical data

Electrical connection	3ph/N/PE 230/400 V 50/60Hz 6.6 kW
Pneumatic connection	6 bar
Motor Saw / Router	2 x 2200 W / 4 x 1050 W
Motor speed Saw / Router	3000 1/min. / 10000 1/min.
Saw blades	330 x 30 x 3.2
Control / Clamping	SPS / pneumatisch
Cutting capacity	see diagramme
Drill depth	30 mm (\varnothing 6/8/10 mm)
Dimensions W/D/H	3540 / 1000 / 1520 mm
Weight	480 kg
Order No.	M 100 0600

Operators panel with emergency stop button

1. Infeed table with clamping units
2. Drill gearbox
3. Drive motors
4. Set-up spindle centres
